Via Salvo D'Acquisto 5, 95022, Aci Catena, Italy

About me:

I'm a Junior Full Stack Web Developer, and my goal is to write code that matters.

When not coding, you can usually find me playing guitar, hiking in the nature, playing videogames, and listening to some music either at home or live in a nice pub.

### WORK EXPERIENCE

01/11/2019 – 31/01/2021 – Catania, Italy

**FRONT END WEB DEVELOPER - INTERN – SEO TESTER ONLINE**

In the first part of the collaboration, I've been bug-fixing and overhauling the front end of a number of e-commerce websites, all based on the Magento CMS.

Later, I've been tasked to build the website of the parent company, using plain HTML and CSS to build a WordPress theme.

In the last part, I worked to an internal SERP tool to integrate in the STO suite.

Across the whole experience, I've been working in team using Git and the AGILE/SCRUM workflow, and I've been exposed to a number of VM technologies such as VirtualBox, Vagrant, Docker, and WSL2.

### EDUCATION AND TRAINING

09/02/2022 – 16/09/2022

**JUNIOR FULL STACK WEB DEVELOPER – Develhope**

In this intensive course of 6(+1) months I've been studying the basics for becoming a modern full stack developer.

The first part covered Git as well as the basics such as HTML5 (+ semantic tags), CSS3 (and frameworks such as Bootstrap), and JavaScript ES6+.

The second part covered React with addons such as React Router, Redux and SWR. We also studied the basics of TypeScript.

The third part covered Node.js and backend technologies such as Express, the Prisma ORM and PostgreSQL as the DBMS of choice.

Along the course, students have been divided in teams and asked to carry on group projects using Git for collaboration and the AGILE/SCRUM workflow.

Also, the course has been accompanied by a career and human development module, to further prepare the student for his next professional life.

### PROJECTS

#### Full Stack Web Apps

As the core part of my personal branding, I've built a personal website which will function as an alternative to my resume and as a showcase for my future projects. It includes a virtual post-it board where visitors can also add theirs, shall they want:

[Fabio Viscuso: home](#)

The project has been built using Next.js and TypeScript and uses an online instance of MongoDB - via their Atlas cloud platform - to manage post-its data. Hosting is provided by Vercel. Additionally, the website supports both Italian and English languages.

----

I've also created a boilerplate for creating e-commerce websites based on React, React Router and Redux, using TypeScript as the main language and other optional tools such as Tailwind CSS:

[Sweet Bakery](#)

This project communicates with a custom back-end based on Node.js and written in TypeScript, uses the Express framework and Prisma as the ORM of choice. It's also hosted on the Heroku platform which provides an online PostgreSQL instance as well. This project uses Vercel for the front-end hosting.

## ● COMMUNICATION AND INTERPERSONAL SKILLS

---

### Basic leadership and communications

---

During Develhope's FS course I've been working as the team lead two times in a row. I pay extreme attention to my co-workers' feedback, and I plan accordingly. I firmly believe that a relaxed working environment is the key for a good productivity. Even though I usually let my teammates pick their own tasks related to bug-fixing and minor improvements, I usually make sure that they follow the schedule and the discussed contribution methods.

I also take pride in the feedback I received about my ability to explain concept and the work done in an easily understandable way, even though I'm aware that this is a skill to maintain and improve upon over time.

## ● LANGUAGE SKILLS

---

Mother tongue(s): **ITALIAN**

Other language(s):

	UNDERSTANDING		SPEAKING		WRITING
	Listening	Reading	Spoken production	Spoken interaction	
<b>ENGLISH</b>	B2	C2	B2	B2	C1

*Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user*

## ● DIGITAL SKILLS

---

### My Digital Skills

Operating Systems (Windows, Linux) | AWS (RDS) | Cloud: Firebase, Heroku, Vercel | Basic command of Linux OS/Command line | Basic Office suites knowledge (MS, Google, LibreOffice)

- **DRIVING LICENCE**

---

**Driving Licence:** A1

**Driving Licence:** B
